Abstract:

The Biggest Goal Of Cryptocurrencies Is To Become A Tool Of The Biggest Problems In This Way Is Not To Identify Users. This Unknown Causes An Acceptance Of A Currencies In The Real World. But What Is The Solution? On The Other Hand, There Is A Positive Point For Many People And Businesses, And On The Other Hand, Many Daily Exchanges Will Challenge People. The Bot coin Network Is Trying To Solve This Problem, It Is If The Privacy Of Individuals Is Maintained And The Current Problems Can Be Resolved. We Introduce The Practical Tools Of Authentication In Blockchain Networks. Goal Is To Create A Blockchain Network Parallel To Other Networks That Will Be Achievable With The Possibility Of Authentication In Blockchain Networks

Summary :

The Architecture Of All Modern Blockchains Suffers From A Number Of Problems, One Of These Is The Lack Of Clarity In The Identity Of The Users, Which Makes Their Acceptance Very Difficult By The General Public And The Community. These Problems Have Caused The Main Purpose Of The Cryptocurrencies, Namely, The Use Of Currencies To Be Used In The Daily Financial Transactions Of The People. Currently The Biggest Advantage Of Encryption, Investment, And Money Laundering, As Well As Money Laundering And Criminal Operations, And This Field Is Distancing Itself From Its Original Ideal. One Of The Biggest Problems Currently Is Complicated, Long, And Unintelligible Who Have No Identity.

and are unknown. We explain the above problems with a few simple examples, Suppose Michael wants to buy a website domain using a crypto currencies, the service provider will send his wallet address and payable amount to Michael, then Michael gets his destination address into his wallet, but when the transaction fails, she gets stressed out and checks the characters again,

for if the slightest mistake is made in involving the long and complicated characters of the destination 's wallet. To confirm the transaction, that amount will be lost forever in the network and no one will ever have access to it

Introduction :

Nowadays, Authentication Is One Of The Most Important Part Of People's Lives And Where You're Going To Have Sensitive Activities Such As Dealing, Creating Accounts In Money Exchange, Transferring Ownership, Opening Bank Accounts And Obtaining A Loan, You Need To Prove Your Identity. However, Today's Systems Are Highly Complex And Weak, And Security Shortcomings Of Such Systems Have Frequently Led To Financial Fraud, Money Laundering And Other Financial Crimes. For Example, The Information And Identity Of The Clients Of The Concentrated Services Has Been Disclosed And Abused.

On The Other Hand, The Identify Cation Or Know Your Customer Or Brie Y "KYC" Is A Long Process Regardless Of Its Application. The Sheer Volume Of Paperwork Associated With Such Processes Has Led To Inefficiencies In Data Collection From Customers To Inefficiencies In Data Collection In Centralized Systems. This Unstable, Complex, And Uncertain Environment Has Enabled The To Cope With The Blockchain Based Solutions To Match Customer Recognition Laws. The Blockchain Technology Allows The Creation Of A Distributed General O Ce That Can Be Shared With All Network Users. In Other Words, Thanks To Blockchain Technology,

VISION

We gain trust with our customers who continuously spend time on our system, in a way that honors their time invested. Combine this with the value gained across the ecosystem, and to create a cycle of loyalty between us.

MISSION

The BOT COIN proposition opens the door for users to gain a foothold in the gaming and blockchain industry alike, through our loyalty token awarded to players.

It solves the problem preventing many users from retaining their investment, with a reward that is valuable to use on a blockchain gaming platform.

COMMUNITY :

“The BOT COIN team is committed to develop a platform with the potential to become the standard for assets and payments in cryptocurrencies and fiat assets. Where people can easily invest and grow their assets gradually with trust & peace of mind.”

INTRODUCTION

Token Name : BOT COIN

Symbol : BOT

Maximum Supply : 1BILLION

Decimals : 18

Network : Binance Smart Chain

Contract : 0x82D54641326080f13b4E7a8310903f0A72B1035E

VISION :

BOT COIN is an ambitious project dedicated to the establishment of a truly decentralized Internet and its infrastructure. BOT COIN built on BSC Smart chain, The BSC Smart chain Protocol, one of the largest blockchain-based operating systems in the world, offers public blockchain support of high throughput, high scalability, and high availability for all Decentralized Applications (DApps) in the BEP-20 ecosystem.

MISSION :

To grow as a benchmark in cryptocurrency industry by 2022. By gaining popularity throughout the world & will be stored in every wallet in the world by crypto community. Giving huge returns to our holders and growing their wallets to billions & trillions with our further future planning's and upcoming projects.
